Payday loans are cash advance provided to a borrower to meet financial needs. As a borrower, you will be required to write a check from your personal checking account as collateral to cover the full payment of this loan. You will be required to sign a loan agreement that tells you the amount you have requested to borrow, the annual percentage rate (APR) for that loan, the amount of interest and fees that may be charged for that loan, and the payment terms of the loan. A single payday advance is typically for two to four weeks. However, borrowers often use these loans over a period of months, which can be expensive. Payday advances are not recommended as long-term financial solutions. This type of credit may be one of the more expensive borrowing options available to you and is meant for short-term use only. *Depending on your state payday loans may also be referred to as a cash advance, delayed deposit, deferred deposit, or deferred presentment loans.*
